Conversation: Correction to Daily Independent article

Dear Mr. Mulvihill and Water District Board of Directors,

There is a long article in the August 11-12 Daily Independent with my name on it. In the second column, it attributes a statement to me that I have not made at any time: "I believe the Water District's hydrology data is incorrect."

As you surely know from having read my letters to you, I do believe that the hydrology information included in the draft mitigated negative declaration is INCOMPLETE and in one case misleading. And it's clear that I believe the draft should be replaced by something more complete.

Meanwhile, I also appreciate the willingness of the Water District Board to accept comments and questions beyond the time available during the comment period at the hearing on July 9th. I know from inquiring at the District office that you are still in the process of responding to questions and comments.

Sincerely,
Annette DeMay
